

Want to Provide Additional Value to your Clients?

As a valued member of our chamber, we wanted to extend to you the opportunity to enhance your client's experience. With our complimentary bill review service, your clients can enjoy additional benefits that set your business apart from the rest.

What does the free bill review include?

Our team of experts will examine your client's energy bills and identify potential areas for savings and optimization. Whether it's electric or natural gas, we'll ensure your clients are getting the best value for their money. Additionally, we'll search for grants and incentives to provide financial support for their efficiency projects.

Why share this with your clients?

Enhance Client Satisfaction

Show your clients that you're committed to their success by providing them with valuable resources to save money, improve efficiency, and minimize project costs.

Differentiate Your Business

Stand out in the competitive landscape by offering a unique value-add that demonstrates your dedication to your client's financial well-being.

Build Trust & Loyalty

By offering your clients a free bill review, you're not only helping them manage their costs, but you're also building trust and loyalty that can lead to long-term relationships.

Check out how this commercial real estate agent saved their client thousands!

SVN reached out to the Chamber Energy Program for help cutting their client's energy costs. Through this simple introduction, SVN's client realized savings totaling over \$3,500. Now we are facilitating the client's LED lighting and HVAC upgrades, and are applying for a grant to offset associated project costs.

Ready to Get Started?

Start providing extra value and savings to your clients today. Simply refer them via email, by reaching out to our Energy Program Manager, Kathy Elseser at kelseser@ceateam.com.
